

What Happened to my Luster?

-
- **Cloudiness or Large Dark Spots:** Kiln was not properly ventilated to allow gasses to escape.
 - **Dull or Dirty Looking:** Poor Ventilation of Kiln or Contaminated Brushes, not cleaned properly prior to use. (Consider using a dedicated brush for Lusters only.) It is not necessary to have a brush for each color, if you clean them thoroughly after each use.
 - **Luster Wipes off:** Most likely cause would be under firing.
 - **Luster Changes to Odd Color:** Probably fired at too hot a temperature.
 - **Luster Pulls Wipes Off:** Usually indicates a greasy area on porcelain. Improper cleaning of porcelain prior to applying Luster.
 - **Luster Cracks or Flakes off:** Luster was applied to thick.
 - **White Pin Size Marks:** Usually means moisture from a cough or sneeze was on the porcelain.

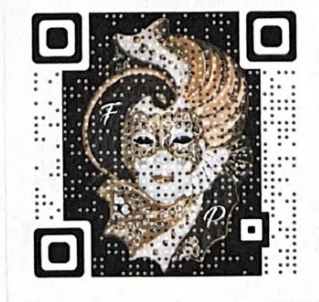

Lusters, Bright Gold 12%, Red Bright Gold, 12%,
